DELIGIBATION FOR THE RECORD

SUNTER: Physical Fitness Program

1. The following officials met at 1430 hours 10 July 1964 in the Office of the Chief, Medical Etaff on the subject of the proposed Agency Physical Fitness Program, and specifically, to hear Mr. Glena Swengros from the President's Council on Physical Fitness:

ont's Council o	n Physicar rans	o f	.MG		
STATINTL	Dr. Tietjen	. 0-	DD/P .DD/I -DD/S		
			CC _Brec Dir/C P :/CD/MS Exc/MS		
			aneerib	ing to Mr.	É

- 2. Dr. Tietjen opened the meeting by describing to Mr. Swengros the general area of interest of each official present, end then invited Mr. Swengros to speak.
- 3. Mr. Swengros outlined the history of the council dating back to 1996. The present council has an annual budget of \$315,000. It is headed by Stan Austal who has four full-time staff members: a publicity man, an administrator, a Director of Foderal-State Relations, and a Director of Stanfal Development. Mr. Swengros is the latter.
- indeed, until 1959 the Council was known as the President's Council on Youth Pitness. Now the Council was known as the President's Council on Youth Pitness. Now the Council was wider range of interest that includes adults and the Armed Porces. The council has worked on specific physical fitness and the Armed Porces. The council has worked on specific physical fitness and the Armed Porces. The council has worked on specific physical fitness and the Armed Porces. The PAA and Would be interested in learning about programs with the PAA and Wow, and would be interested but with view to the planned Agency program, not only for its own sake but with view to the planned Agency program, not only for its own sake but with view to adapting our program experience to other agencies. The FAA program is essentially a "home-type" program wherein some 12% of a certain group of FAA essentially a "home-type" program wherein some 12% of a certain group of FAA employees volunteered to follow a home exercise program.
 - 5. Mr. Swengros then described the philosophy of end the medical thinking behind the work of the President's Council. Since fifty-five thinking behind the work of the President's Council. Since fifty-five thinking behind the work of the President's Council. Since fifty-five thinking behind the work of the President's Council. Since fifty-five thinking behind the work of the Council's efforts are to help the people of the council's efforts are to help the people of the council's

in three vital physical respects:

- a. Muscular strength
- b. Muscular endurance
- c. Cardiovascular endurance

Medical science has demonstrated that regular moderate exercise is of great help in this regard. Moreover, such exercise develops the "collateral circulation" that in many cases prevents a heart attack from being fatal. Mr. Swengros explained that isometric contraction exercises are helpful toward muscular strength and endurance but are not beneficial toward improving cardiovascular endurance — which is most important for adults.

- 6. Mr. Swengros then passed out to each official present an envelope containing peophlets and brochares issued or endorsed by the Council. At Dr. Tietjen's request he submitted the following recommendations for establishing a physical fitness program:
 - a. Get your people to play a game, hike, cycle, etc. But first you must get them in shape for this.
 - b. Organize smaller pilot groups from each component, give them some status, and have them set the example for a few months. Then ask for additional volunteers.
 - c. Form clubs through the Employees Recreation Association, e.g., "Hoon Time Jouwers", that would exercise during duty hours.
 - d. Organize an off-duty exercise program wherein employees agree to follow faithfully a home exercise program. Here you must give the employees guidence but not necessarily physical exeminations.

SUMMECT: Physical Fitness Program

8. Dr. Tietjen asked if the Council advises on how an exercise facility should be used. Wr. Evengros answered in the negative.

STATINTL

suggested that in view of the Agency's space problem the "home exercise program" would be better for CIA.

10. Dr. Fietjen adjourned the meeting at 1530 hours by thanking Mr. Swengros and indicating that we would look into the programs of other agencies such as the FMA, and that we would meet again to discuss a specific proposal for an Agency Physical Pitness Program.
